👤 Professional Summary

Mobile Software Engineer specialized in **Flutter and Dart**, with 4+ years shipping production apps for Android and iOS and a B.Sc. in Systems Engineering from UFMG. At **R10 Score** (1M+ Google Play downloads), built real-time, high-traffic features end to end, such as the 2026 World Cup experience and the live bet wall. At Prime Results, turned a white-label app for 8 client companies into one flavor-based codebase. Strong in Clean Architecture, BLoC/Cubit, real-time data (WebSocket, Protobuf) and testing; also delivers with React, NestJS, Java and Spring.

🔧 Core Technical Skills

Mobile: Flutter, Dart, Android, iOS, Kotlin, Swift, platform channels, flavors / white-label, adaptive tablet UI, In-App Purchases, React Native

State & Architecture: BLoC, Cubit, Freezed, GoRouter, Clean Architecture, SOLID, dependency injection, modular monorepo

APIs & Real-Time: REST APIs, JSON, Protobuf, WebSocket, Swagger / OpenAPI

Firebase & Data: Firebase, Crashlytics, Analytics, Realtime Database, feature flags, SQL, PostgreSQL

Web & Backend: React, TypeScript, NestJS, Prisma, Java, Spring

Quality & Delivery: Unit, Widget & Integration Testing (bloc_test, mocktail), Code Review, CI/CD, GitHub Actions, Codemagic, Git, Azure DevOps, Figma, Scrum, AI-assisted development (Claude Code)

Languages: Portuguese (native), English (professional working proficiency, B2 • TOEFL)

💼 Professional Experience

Full Stack Developer | Mobile (Flutter)

Jun 2025 – Sep 2026

OTG Ventures • R10 Score

Live football scores and statistics app • 1M+ Google Play downloads • 11-package Flutter monorepo

- Delivered the **2026 World Cup experience** (bracket, group tables, Favorite Team vote, match guesses and CMS-driven content) in time for the tournament's fixed start, joined by **22% of all accounts**.
- Main mobile developer on **Notified Bet**: a live bet wall with drag-and-drop ordering saved on the backend (optimistic updates with rollback) and live status over **WebSocket**.
- Unblocked Google Play publishing** after the 2026 target-API deadline (targetSdk 36, Play Billing Library 8.0.0), protecting In-App Purchase subscription revenue.
- Brought the test suite back to green, fixing two production bugs along the way, and tracked down an intermittent freeze in match statistics; one of the team's most active contributors, with **500+ merged PRs** and 570+ code reviews.
- Built on **WebSocket (Protobuf and JSON) and REST**, with **Firebase** feature flags and Crashlytics; also contributed full stack to **OTG Partners**, the group's affiliate-commission platform (**React, NestJS**, Prisma, PostgreSQL).

Mobile Developer

May 2022 – May 2025

Prime Results

Intern from May 2022, Mobile Developer from Feb 2023 • white-label app for the field and point-of-sale teams of 8 client companies • Android & iOS

- Consolidated a **white-label app for 8 client companies**, kept on separate cherry-picked branches, into **one codebase with Flutter flavors**, so every fix ships to all clients from a single main branch.
- Adjusted and improved **phone and tablet layouts** across the app, used by field and point-of-sale teams.
- Delivered features end to end, from **Figma** to **REST API** integration and releases on **Google Play and the App Store**, and contributed to **Java** and **Spring** services and **React** web projects.

Mobile Developer – Freelance

Mar 2025 – Apr 2025

Upbeat Studio • Drum Coach app – Germany (remote)

- Built an interactive **Flutter and Dart** app for learning and practicing drums, working remotely and autonomously with an international team in English.

Programming Instructor (Volunteer)

Jan 2025 – Aug 2026

Garotas Aplicadas Project – AVEC | Centro Universitário Una

- Taught theory and hands-on programming classes to public high-school girls in Belo Horizonte, in a social initiative to widen female participation in technology.

Business Analyst & Front-End Developer

Mar 2022 – May 2022

iJunior

- Gathered requirements with clients and the sales team and built custom apps and websites with **React Native** for organizations across different sectors, using **Scrum and Kanban**.

Systems Analyst

Oct 2021 – Jan 2022

Interact Place

- Helped build an interactive mobile exhibition guide for **Palácio das Artes**, one of Belo Horizonte’s major cultural institutions, where QR codes connect visitors to artwork information.

 Education & Certifications

Bachelor’s Degree in Systems Engineering

2020 – 2026

Federal University of Minas Gerais – UFMG

Certifications: TOEFL (English, B2) · CCAA English course (2008 – 2019) · Google Play Academy – Store Listing Certificate
